AUTOMATED ELECTRIC METER REPLACEMENT

Frankton Municipal Utilities has begun electric meter replacements. During this month and next, you may notice utility workers changing out electric meters throughout town. The changeout will be minimal interruption in your service, only to take out the old meter and install with new. If there are issues with your meter base and we are unable to switch out your meter, you will be contacted by phone or letter that your meter base requires attention. The new automated meters will eliminate the need for manual readings each month and will help improve reliability of service and detecting outages. During this process, your bill may have more or less than the typical 30 days billing cycle. Frankton Utilities staff would like to thank you in advance for your patience, kindness and understanding as we all work together to improve our electric utility system. You may contact the Town Hall Monday-Friday 9-5 PM for questions regarding this notice. 765-754-7285

Sincerely,
Frankton Municipal Utilities
